

HOW TO CHANGE NAMESERVER TO POINT TO FAVHOSTING FROM THE DIFFERENT DOMAIN REGISTRAR LIKE GODADDY.

1. If you purchased domain from godaddy and you want favhosting to host your domain, follow this steps.
2. Buy web hosting package at favhosting.com (Silver, gold, platinum plans)
3. Select will use my existing domain and update my nameservers since you have already your domain from godaddy.

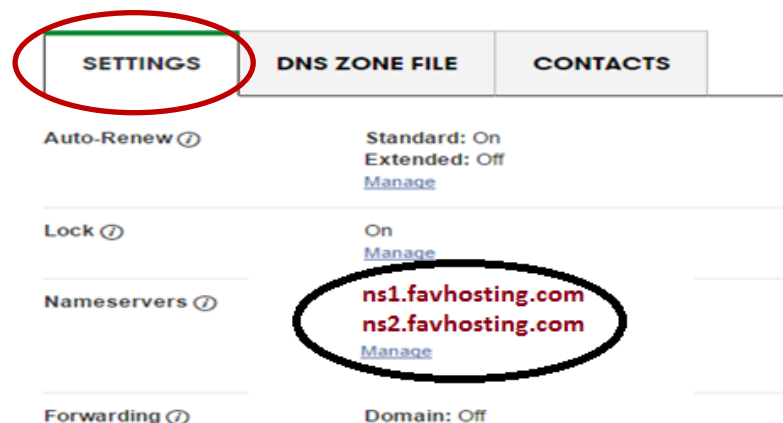

4. Enter your domain and click continue and checkout.
5. Favhosting will give you the NAMESERVER to point and update on your domain registrar, so you need to go to your godaddy account, manage domain and change the name server to favhosting.

The default NAMESERVERS of your domain was GODADDY, so you need to change it to the hosting provider FAVHOSTING, (ns1.favhosting.com) (ns2.favhosting.com)

CLICK MANAGE

and now it will be live in just a few minutes, since favhosting have the fastest data center from UK.
